

New York State law allows students with **respiratory(breathing) conditions, allergies, and/or diabetes the right to independently carry and use their inhaled respiratory rescue medications; epinephrine auto-injectors; and insulin, glucagon, and related diabetes supplies** if the following is provided to the school:

1. written permission from the parent/guardian; and
2. written provider order with an attestation stating both the diagnosis, and that the student has demonstrated they can effectively administer the medication(s).

Independent carry and use of medications means that your child will take their own medicine without any help. The school will not know if your child takes their medicine. Staff support would be provided only in an emergency.

If you want your child to independently carry and use a medication for a condition listed above during the school day or at school sponsored events, you will need to ask their health care provider to put in writing (attest), that they have watched your child use the medication correctly.

[Please click here to download the Attestation and Parent Permission for Independent Medication Carry and Use from required.](#)

Any questions regarding the required form or other information can be directed to your child's building nurse.
